

Overview

System Architecture Specification: Landing Page Builder Core Rules

1. Page Hierarchy & Layout Structure

The landing page template is built upon a structured layout engine consisting of **Mandatory Anchors**, **Global Static Modules**, and **Flexible Dynamic Slots**.

None

1. Hero Section (Above the Fold)	[MANDATORY ANCHOR]	
▼ Dynamic Slot: Optional Intermediate/Content Blocks		
2. Price Section	[MANDATORY ANCHOR]	
▼ Dynamic Slot: Optional Intermediate/Content Blocks		
3. Trust & Social Proof Section	[MANDATORY ANCHOR]*	
▼ Dynamic Slot: Optional Static/Dynamic Sections		
4. Global Footer	[MANDATORY ANCHOR]	

*Note: Trust Section mandatory status is subject to further architectural review.

2. Component Classification Matrix

2.1. Mandatory Anchor Sections

These core sections cannot be deleted from a page. Their order is structurally enforced:

- 1. **Hero Section / Above the Fold**
- 2. **Price Section**
- 3. **Trust Section** *(Pending team confirmation)*
- 4. **Footer** *(Global site-wide component)*

2.2. Global Static Sections

Pre-built modules with non-editable layout structures, managed globally across the platform:

1. **Newsletter / Subscription Section:** Global across the entire website (Visibility toggle only).
2. **Contact Us Section:** Global shared component across Home and Route Pages (Visibility toggle only).

2.3. Dynamic Configurable Sections

Customizable content modules that can be added into dynamic page slots between mandatory anchors:

1. **Logo Showcase & Marquee Section**
2. **Feature Sections (3 Layout Variants):**
 - *Highlighted:* Primary 3-Card Value Proposition Grid (64x64 icons).
 - *Standard:* Secondary 3-to-4 Card Feature Grid (48x48 icons).
 - *Compact:* 3-to-4 Bullet / Item List (48x48 icons).
3. **Quick Facts Content Section** (Specialized Route Page layout).
4. **2 / 3 / 4 Content Cards Grid** (With all-or-nothing text validation).
5. **Highlight Big Image Section** (Full banner with CTA).
6. **Text & Media Split Section** (Variants: Text + CTA + 0/1/2 Images).

3. Universal Controls for Dynamic Sections

Every dynamic section added to the page builder inherits the following standardized styling controls:

3.1. Background Color Palette

- **Control Type:** Radio / Color Preset Selector.
- **Palette Options:**
 1. `White (Default): #FFFFFF`
 2. `Light Grey: rgba(0, 0, 0, 0.04) (4% Black)`
 3. `Light Bronze / Sand: #F7F2EE`

3.2. Section Heading Engine

- **Heading Size Preset:** Dropdown / Segmented Control:

- S (Small)
 - M (Medium)
 - L (Large)
 - *Each section type has an assigned system default size.*
 - **Heading Alignment:** Segmented Control:
 - Left-Aligned (`text-align: left`)
 - Center-Aligned (`text-align: center`)
 - *Each section type has an assigned system default alignment.*
-

4. Builder Capabilities & Business Logic

4.1. Multi-Instance Support (Component Duplication)

- Administrators can insert **multiple instances** of any dynamic section on the same page (e.g., adding two separate *Text & Media* sections with different content).
- Each instance maintains independent state, styling, and data storage.

4.2. Layout Direction / Horizontal Orientation

- Dynamic content blocks support horizontal layout switching (e.g., media on the left vs. media on the right) to enable visual rhythm and alternating "zigzag" reading patterns.

4.3. Default Presets & Global Templates Engine

- **System Defaults Configuration:** The builder must support admin-level predefined default values for all dynamic sections.
- **Priority Scope:** System defaults must be configured with highest priority for the **Feature Sections** (*Highlighted*, *Standard*, and *Compact*), ensuring that when a content manager inserts a new feature block, it automatically populates with standardized company perks and default icons.

Hero Section

Component Specification: Hero Section

1. Overview

The **Hero Section** is the primary above-the-fold block of the landing page. It controls global theme modes, responsive backgrounds, the heading hierarchy (Eyebrow, Title, Paragraph), pricing displays with associated branding logos, and the primary Lead Form Call-to-Action (CTA).

2. Global Styles & Background Settings

2.1. Theme Mode

- **Control Type:** Switcher / Radio (Light | Dark).
- **Behavior & Impact:** Changing the theme mode automatically updates the default color schemes and assets across several components:
 - **Header Logo:** Bronze (Light mode) / White (Dark mode).
 - **Accreditation Badges:** Adjusts display assets for IATA, IATAN, ARC, and BBB.
 - **Header Elements:** Menu trigger button and phone number styling.
 - **Embedded Widgets:** Trustpilot widget theme and Countdown Timer widget theme.

- **Default Typography:** Applies default baseline text colors for headings and body copy.

2.2. Desktop Background

- **Desktop Image:** File Uploader (PNG, JPG, WebP).
- **Overlay Color:** ColorPicker. *Default: #000000 (Black).*
- **Overlay Opacity:** Slider (0% – 100%). *Default: 50%.*

2.3. Mobile Background

- **Mobile Image:** File Uploader (PNG, JPG, WebP). Rendered on screen viewports < 768px.
- **Overlay Color:** ColorPicker. *Default: #000000 (Black).*
- **Overlay Opacity:** Slider (0% – 100%). *Default: 50%.*

3. Eyebrow Section

A dedicated micro-content line located directly above the primary Main Title (H1).

- **Display Mode Selector:** Dropdown with 5 options:
 1. None (Hidden)
 2. Text
 3. Timer
 4. Logo
 5. Badge

Mode Configuration Matrix:

Display Mode	Configurable Fields / Controls	Behavior & Validation Rules
None	None	Completely removed from DOM.
Text	1. Eyebrow Text (Single-line Text Input) 2. Inline Badge (<i>Optional Toggle</i>): — Icon Picker — Label (Text Input) — ColorPicker	Displays a text line. Allows appending an optional inline pill badge next to the text.

Timer	1. Prefix Text (Single-line Text Input) 2. End Date (Date & Time Picker) 3. Inline Badge (<i>Optional Toggle</i>): — Icon Picker — Label (Text Input) — ColorPicker	Displays a countdown timer towards the specified <code>End Date</code> . Visual styling inherits the Global Theme Mode (Section 2.1).
Logo	Logo Upload (File Uploader: <code>SVG</code> , <code>PNG</code>)	Displayed inside a container with a fixed 10:1 aspect ratio (Recommended container dimensions: <code>560x56 px</code>).
Badge	1. Icon (Icon Picker) 2. Label (Text Input) 3. Color (ColorPicker)	Displays a standalone custom badge.

4. Typography Group (Title & Paragraph)

4.1. Main Title (H1)

- **Typography Preset Selector:** Dropdown with 2 options:
 - `Title 1` (56px)
 - `Title 2` (48px)
- **Text Formatting (Inline Rich-Text):**
 - Font weight / styles: **Bold** (`Ctrl+B`), *Italic* (`Ctrl+I`).
 - **Per-character Color Picker:** Allows assigning custom colors to individual characters, words, or selections.
 - **Line Breaks:** Supports multiline text (`Enter` / `<br>`).

4.2. Paragraph (Subtitle / Body Text)

- **Text Formatting (Rich-Text):**
 - Font styles: **Bold**, *Italic*, ~~Strikethrough~~.
 - **Per-character Color Picker:** Allows inline color customization for any text segment.
 - **Lists:** Numbered list (`<ol>`) and Bulleted list (`<ul>`).
 - **Line Breaks:** Supports soft breaks (`Shift+Enter`) and paragraph breaks (`Enter`).

5. Pricing Module & Brand Assets

5.1. Price Text Fields

Consists of three vertically stacked rich-text fields:

1. **Top Label** (e.g., *"Prices starting from"*):
 - Controls: ColorPicker, Bold, Italic, Strikethrough.
2. **Price*** (*Mandatory field*):
 - Controls: ColorPicker, Bold, Italic, Strikethrough.
3. **Bottom Label** (e.g., *"per person / taxes included"*):
 - Controls: ColorPicker, Bold, Italic, Strikethrough.

5.2. Price Aside Image / Logo

- **Status:** Optional (Toggle: Enabled / Disabled).
- **Allowed Formats:** SVG, PNG.
- **Container Aspect Ratio: 1:2** (Vertical orientation, placed opposite/beside the price block).

5.3. Price Bottom Image / Logo

- **Status:** Optional (Toggle: Enabled / Disabled).
- **Allowed Formats:** SVG, PNG.
- **Container Aspect Ratio: 10:1** (Fixed container size: 560x56 px, placed directly below the price block).

6. Lead Form: Call-to-Action (CTA) Button

- **Button Label Text:** Single-line Text Input.
 - *Default Value:* "Get My Quote"
- **Button Background Color:** ColorPicker (with Alpha/Opacity channel support).
 - *Default Value:* `rgba(0, 0, 0, 0.88)` (88% opaque black).

Prices section

Component Specification: Prices Section

Explore United Airlines Business Class fares:

Optional subheading

Europe		Oceania	Africa	Middle east	Indian Subcontinent
Destination					Published / Our price
	Cancun Business Class	\$2,400		From	\$2,150*
	San Juan Business Class	\$2,700		From	\$1,920*
	Honolulu First	\$3,150		From	\$2,180*
	Tokyo Business Class	\$3,100		From	\$2,050*
	Osaka Business Class	\$2,950		From	\$1,870*
	Lisbon First	\$2,800		From	\$2,230*
	Milan Premium	\$2,800		From	\$2,230*
	Guam Premium	\$2,800		From	\$2,230*
	Rome Premium	\$2,800		From	\$2,230*
	Frankfurt Premium	\$2,800		From	\$2,230*
	Brisbane Premium	\$2,800		From	\$2,230*

Your destination isn't listed? Tell us where you want to go, and we'll find the United Airlines Business Class fare to match. [Call 866-768-4202](tel:866-768-4202)

1. Overview

The **Prices Section** displays fare comparison tables, featured routes, or package deals alongside sticky media elements. It supports regional tab filtering, customizable row data, global column visibility controls, and deep integration with the lead generation modal (pre-populating destination data).

2. Media Column (Visual Assets)

- **Layout Type Selector:** Radio / Segmented Control:

- 1 Image

- 2 Images
 - **File Uploaders (Conditional):**
 - If 1 Image selected: Single file uploader.
 - If 2 Images selected: Two separate uploaders (Large Image and Small Image).
 - **Asset Specifications:**
 - **Aspect Ratio:** Fixed 1:1 (Square) for all uploaded images.
 - **Supported Formats:** JPG, PNG, WebP.
 - **Frontend Behavior:** The media container has **Sticky Positioning** (`position: sticky`), remaining pinned in the viewport while the user scrolls through the pricing table.
-

3. Section Header Typography

3.1. Section Title (H2)

- **Font Styling:** Bold by default; toggleable to *Italic*.
- **Color Picker:** Hex/RGBA input. *Default:* `rgba(0, 0, 0, 0.88)` (88% Black).
- **Conditional Visibility:** If left blank/empty, the element is not rendered in the DOM.

3.2. Subheading (Optional)

- **Text Formatting (Rich-Text):**
 - Styles: **Bold**, *Italic*, ~~Strikethrough~~.
 - **Per-character Color Picker:** Inline color control for any selected character/word.
 - **Lists:** Numbered lists (`<ol>`) and Bulleted lists (`<ul>`).
 - **Line Breaks:** Supported (`Enter` / `Shift+Enter`).
 - **Conditional Visibility:** If left blank/empty, the element is not rendered.
-

4. Prices Table: Global Settings & Column Headers

4.1. Column Headlines (Table Header)

- **Headline 1 (Left Column):** Text Input. *Default:* `"Route & Cabin"`.
- **Headline 2 (Right Column):** Text Input. *Default:* `"Published / Our Fare"`.
- **Behavior:** If a field is cleared/empty, its respective column header is hidden.

4.2. Global Row Elements Visibility (Master Toggles)

Allows administrators to show/hide specific elements across **all rows simultaneously**:

- Show/Hide Labels 1 & 2 (Subtitle details)
- Show/Hide Label 3 (Price super-title)
- Show/Hide Anchor Price (Strikethrough original price)
- Show/Hide Airline Logo

5. Price Row Structure & Data Fields

Each individual row consists of the following editable parameters:

Field Name	Control Type	Default Value	Description & Rules
Row Title*	Text Input	<i>Required</i>	Main route or destination name (e.g., "London to New York").
Price*	Text Input	<i>Required</i>	Current offer / our fare (e.g., "\$1,234").
Anchor Price	Text Input	<i>Optional</i>	Strikethrough baseline fare (e.g., "\$4,321"). Subject to global toggle.
Label 1	Text Input	<i>Optional</i>	Route detail placed under the title (e.g., "Business Class").
Label 2	Text Input	<i>Optional</i>	Additional route detail (e.g., "Nonstop").
Label 3	Text Input	<i>Optional</i>	Micro-label positioned above the price. Supports strikethrough styling as an alternative anchor.
Logo	Uploader (SVG, PNG)	<i>Optional</i>	Carrier/partner logo. Aspect ratio: 1:1 .
Region	Dropdown	"Global"	Options: Global, Europe, Oceania, Middle East, Africa, Indian Subcontinent, Northern Africa, Asia.

Text	ColorPicker	<code>rgba(0, 0,</code>	Custom color override for row typography.
Color		<code>0, 0.88)</code>	

6. Table Controls, Ordering & Bulk Import

6.1. General Table Controls

- **Region Tabs Toggle:** Switch (`Enabled` | `Disabled`). *Default: Disabled (Off).*
 - When enabled, renders filter tabs at the top of the table based on the regions assigned to active rows.
- **Row Count Limits:**
 - **Default State:** 5 pre-populated rows.
 - **Maximum Limit:** Up to 30 rows (*TBD / open for discussion*).
- **Reordering & Management:**
 - Action buttons: `Move Up` (▲), `Move Down` (▼), and `Delete` (X).
 - Modal/Accordion expansion on click for full field editing.

6.2. Bulk Import via Raw Text (Fast Entry)

Optional administrative shortcut allowing bulk addition of rows via a formatted delimiter block:

- **Format Pattern:** `Row title/Price/Anchor price/Label 1/Label 2/Label 3/Region`
- **Syntax Example:**

```
None
Berlin/1,234/4,321/Business Class/Nonstop/-/Global
Paris/999/2,500/Premium Economy/1 Stop/Special Fare/Europe
Tokyo/1,850/3,900/First Class/Nonstop/-/Asia
```

7. Interactive Frontend Behavior (Lead Capture)

- **Trigger:** User clicks on any row or row CTA link.
- **Action:** Opens the **Lead Generation Modal**.
- **Data Passing:** Automatically pre-fills the modal's `Destination` input field with the value from the clicked row's **Row Title**.

8. Bottom Paragraph (Footer / Disclaimer)

- **Text Formatting (Rich-Text):**
 - Typography: **Bold**, *Italic*, ~~Strikethrough~~.
 - **Per-character Color Picker:** Custom inline color application.
 - **Hyperlinks:** Link insertion with URL and Open in new tab options.
 - **Lists:** Numbered () and Bulleted ().
 - **Line Breaks:** Supports soft/hard line breaks.
- **Conditional Visibility:** If left blank/empty, the container is hidden.

Trustpilot & Trust options.

Component Specification: Trust & Social Proof Section (Trustpilot & Trust Options)

Note for Development Team: This section involves refactoring the legacy Trust component. Changes are proposed as a **Global Update** across all builder templates.

1. Overview

The **Trust & Social Proof Section** validates brand credibility through customer ratings (Trustpilot), industry accreditations, and high-profile endorsements (celebrity/VIP reviews). This specification defines a major layout refactoring, introducing switchable layout densities and streamlined DOM structures.

2. Layout & Display Modes

- **Display Mode Selector:** Radio / Segmented Control:
 - `Extended` (*Default*): Full-width, multi-column social proof layout.
 - `Compact`: Streamlined, low-profile layout optimized for content-dense landing pages to prevent visual clutter and reduce page length.

3. Detailed Specifications for `Extended` Mode

Based on updated UI/UX guidelines, the following architectural and stylistic adjustments must be applied to the `Extended` layout:

3.1. Trustpilot Reviews Container Simplification

- **DOM Refactoring:** Remove the redundant outer wrapper/nested container enclosing the Trustpilot widget.
- **Behavior:** Trustpilot reviews now integrate seamlessly into the main section grid without extra background boxes or double borders.

3.2. Deprecation of Standard Trust Badges

- **Removed Elements:** Permanently remove the following legacy security cards from this section:
 - `24/7 Support Card`
 - `SSL Secured Card`
 - `PCI DSS Compliant Card`
- **Rationale:** Reduces visual noise, refocusing user attention directly on authentic user reviews and tier-1 accreditations.

3.3. Celebrity / VIP Review Card Adjustment

- **Spacing Update:** Adjust the **Right Padding** (`padding-right`) of the Celebrity/Influencer Review container to match updated design tokens.
 - **Layout Goal:** Prevents awkward text wrapping, improves visual breathing room, and aligns the VIP quote neatly with adjacent Trustpilot review cards.
-

4. Admin Panel Settings & Controls

Control Name	Type	Options / Defaults	Description
Section Layout Mode	Radio /	Extended (<i>Default</i>)	Determines the overall visual footprint of the section.
	Segmented	Compact	
Trustpilot Integration	Toggle	Enabled / Disabled	Toggles the rendering of the live Trustpilot feed.
Celebrity Review Block	Toggle	Enabled / Disabled	Enables or hides the featured VIP testimonial card.

5. Design & Asset Alignment

- All updated padding values, spacing tokens, and typography alignments must strictly adhere to the latest **Figma Design Specifications** (refer to the design file for exact pixel/rem dimensions).

Global Static Sections

Component Specification: Global Static Sections

1. Overview

Static sections are pre-designed, globally managed blocks with fixed layouts and standardized business logic. These components can be toggled on or off on individual page templates (e.g., Home Page, Route Pages) without requiring manual content restructuring by content managers.

2. Section 1: Newsletter / Subscription Section

2.1. Current Scope (Phase 1)

- **Architecture:** Static hardcoded layout with fixed copywriting and visual assets.
- **Functionality:**
 - Email input field with regex-based client-side validation.
 - Form submission handler integrated with the core CRM/Marketing API.
 - Inline Success / Error message feedback states.

2.2. Admin Panel Controls (Page Level)

- **Section Visibility:** Toggle (`Enabled` | `Disabled`).
 - Determines whether the subscription block is rendered on the target page.

2.3. Future Scope Roadmap (Phase 2 Note)

Note for Development Team: While currently static, write the underlying component structure modularly. In Phase 2, this section will receive customization capabilities (editable headings, configurable incentives/disclaimers, and selectable background themes).

3. Section 2: Contact Us Section

3.1. Template Distribution & Reusability

- **Page Coverage:** Shared across multiple page templates, primarily:
 - **Home Page**
 - **Route Pages** (Destination landing pages)

3.2. Current Scope & Content Structure

- **Architecture:** Standardized corporate contact matrix.
- **Component Elements:**
 - Direct phone numbers with active `tel:` protocols for click-to-call.
 - Support email links with active `mailto:` protocols.
 - Operating hours / availability notices (e.g., *24/7 Concierge Support*).
 - Direct link/trigger to open the primary Lead Generation Modal.

3.3. Admin Panel Controls (Page Level)

- **Section Visibility:** Toggle (*Enabled | Disabled*).
 - Enables or hides the Contact section based on page-specific content density requirements.

4. Admin Configuration Summary

Static Block	Admin Controls	Page Template Placement	Roadmap / Phase 2 Scope
Subscription Section	Visibility Toggle (<i>On/Off</i>)	Global / All landing templates	Custom text, imagery & color overrides (<i>Phase 2</i>)
Contact Us Section	Visibility Toggle (<i>On/Off</i>)	Home Page, Route Pages	Multi-office / regional contact routing (<i>TBD</i>)

Content Sections Library

1. Global Section Background Styling

- **Background Color Control:** ColorPicker with preset swatches.
 - **Default Color:** #FFFFFF (Pure White).
 - **Preset Swatch 1:** #F7F2EE (Warm Sand / Neutral).
 - **Preset Swatch 2:** `rgba(0, 0, 0, 0.04)` (4% Black / Subtle Grey Tint).
 - **Custom Color:** Full Hex/RGBA selection available.

Aircraft types and lounge availability are subject to operational changes. Your concierge will verify the exact configuration before booking.

Field Name	Type	Status	Description
------------	------	--------	-------------

Section Title	Text Input	Mandatory	Main heading for the section.
Primary Paragraph	Rich-Text Area	Mandatory	Lead intro paragraph.
Card 1 (Title & Text)	Text Inputs	Mandatory	Metric/Fact card 1.
Card 2 (Title & Text)	Text Inputs	Mandatory	Metric/Fact card 2.
Card 3 (Title & Text)	Text Inputs	Optional	Metric/Fact card 3 (hidden if empty).
Card 4 (Title & Text)	Text Inputs	Optional	Metric/Fact card 4 (hidden if empty).
Secondary Paragraph	Rich-Text Area	Optional	Supplementary closing text placed below the cards.

2.2. Media Showcase Grid

- **Uploaders:**
 - Upload Small Image 1 (File Uploader: JPG, PNG, WebP)
 - Upload Small Image 2 (File Uploader: JPG, PNG, WebP)
 - Upload Big Image (File Uploader: JPG, PNG, WebP)
 - **Container Dimension Constraints:**
 - **Minimum Container Height:** 400px
 - **Maximum Container Height:** 640px
 - **Aspect Behavior:** Images adapt responsively within these constraints using `object-fit: cover`.
-

3. Section Type 2: 2 / 3 / 4 Cards Section

A380 Three Class long-range

Experience the Emirates A380 lower deck with our 3D seat map.

Indulge in a refresh

There's nothing quite like a rejuvenating shower to leave you feeling inspired. Prepare for your arrival in our A380 Shower Spa, using our exclusive Voya spa products.

A new shared experience on board

Relax in a sleek seating arrangement in our A380 Onboard Lounge. Enjoy a selection of treats, kick back with a cocktail or indulge in global conversation with fellow passengers.

Arrive inspired

Whether you're flying to your next meeting or enjoying your latest adventure, travelling in Business Class helps you arrive inspired.

Aircraft types and lounge availability are subject to operational changes.
Your concierge will verify the exact configuration before booking.

A modular grid component for displaying service pillars, highlights, or value propositions.

3.1. Header Controls (Optional)

- **Section Title:** Text Input (Optional).
- **Subheading:** Text Input / Rich-Text (Optional).

3.2. Grid Configuration & Card Management

- **Card Count Selector:** Radio / Segmented Control: 2 Cards | 3 Cards | 4 Cards.
- **Per-Card Fields:**
 - **Card Image*** (Mandatory): File Uploader (JPG, PNG, WebP).
 - **Card Title** (Optional): Text Input.
 - **Card Paragraph** (Optional): Text Area.

3.3. Text Consistency & Validation Logic

Validation Rule (All-or-Nothing Content):

- Text fields are optional, but text presence must be **globally consistent across all cards**.
- Either **ALL** active cards contain text (Title and/or Paragraph), or **NO** cards contain text (rendering a pure image gallery grid).

- **Validation Trigger:** If an admin fills in text for Card 1, the form system marks text fields on Card 2 (and 3/4 if active) as mandatory before allowing the page to be saved or published.

4. Section Type 3: Large Image Feature Section

The Emirates A380 Blueprint

Experience the pinnacle of transatlantic travel. The A380 offers unparalleled space, a dedicated onboard lounge, and direct aisle access for ultimate productivity.

Label

A high-impact banner block designed for visual storytelling, destination previews, or interim call-to-actions.

4.1. Configurable Parameters

- **Featured Image*:** File Uploader (JPG, PNG, WebP) — Full-width or boxed high-resolution banner.
- **Section Title:** Text Input.
- **Subheading:** Rich-Text Area.
- **CTA Button Settings:**
 - **Button Label:** Text Input (e.g., *"Explore Deals"*).

- **Button URL / Destination:** Text Input (Supports relative URLs, absolute links, or modal triggers like `#lead-modal`).

5. Section Type 4: Text & Media Section

London Executive Guide

The NYC-London Red-Eye Strategy

Flying Business Class across the Atlantic is a race against the clock. On the 7-hour sprint from New York to London, sleep is the ultimate metric. Carriers like American Airlines (Flagship First) and British Airways (Club Suite) prioritize 180-degree lie-flat beds and direct aisle access. Skip the in-flight meal, maximize your rest, and utilize the LHR Arrivals Lounges for a shower and espresso before heading straight to the City.

Label

A versatile split-layout component pairing rich editorial content with flexible media arrangements.

5.1. Layout & Alignment Controls

- **Media Layout Mode:** Segmented Control:
 - No Photo (Full-width text content)
 - 1 Photo (Single media container)
 - 2 Photos (Stacked / Asymmetrical dual media container: Large + Small)
- **Media Orientation:** Radio Control:
 - Image Left / Content Right
 - Content Left / Image Right

5.2. Content & Editorial Formatting

- **Title:** Text Input.
- **Paragraph:** Rich-Text Editor supporting:
 - Typography: **Bold**, *Italic*.

- Structure: Numbered lists (), Bulleted lists ().
- Interactive: Hyperlink insertion (URL, open in new tab).
- **CTA Button (Optional Toggle):**
 - Toggle: Show Button (On | Off).
 - **Button Label:** Text Input.
 - **Button URL / Destination:** Text Input.

Intermediate & Supporting Sections

Component Specification: Intermediate & Supporting Sections

1. Logo Showcase & Marquee Section

A dynamic trust-building section displaying partner, client, or airline logos with an automated fallback for horizontal overflow.

1.1. Header Controls (Optional)

- **Section Title:** Text Input (*Optional — hidden if left empty*).
- **Subheading:** Text Input / Rich-Text (*Optional — hidden if left empty*).

1.2. Logo Items & Marquee Behavior

- **Asset Uploaders:** Multi-file Uploader (SVG, PNG).
 - **Asset Constraints:** Fixed height of 36px (width scales proportionally to maintain aspect ratio).
 - **Responsive Behavior / Marquee Logic:**
 - **Static Grid:** If the total width of all uploaded logos fits within the container/viewport width, logos are rendered in a centered static row.
 - **Smooth Marquee Ticker:** If the total width exceeds the container width, the component automatically transforms into a continuous, smooth, infinite-loop marquee (scrolling ticker animation).
-

2. Primary Cards Section

Optional heading

Optional subheading

Unpublished Fares
Access wholesale business class inventory not available on public sites.

Dedicated Concierge
Bypass airline call centers. Your personal agent handles rerouting and upgrades 24/7.

Complex Routing
We combine multiple carriers to build the fastest global routes.

A high-visibility 3-column value proposition block designed for core benefits or key selling points.

2.1. Header Controls (Optional)

- **Section Title:** Text Input (*Optional — hidden if empty*).
- **Subheading:** Text Input / Rich-Text (*Optional — hidden if empty*).

2.2. Card Configuration

- **Card Count:** Fixed at **3 Cards**.
- **Per-Card Content Matrix (All fields are mandatory for all 3 cards):**

Field Name	Control Type	Specifications & Validation
Card Icon*	File Uploader (SVG, PNG)	Fixed container size: 64x64 px .
Card Title*	Text Input	Mandatory headline per card.
Card Paragraph*	Rich-Text Area	Mandatory description text.

3. Secondary Cards Section

Optional heading

Optional subheading

Unpublished Fares
Access wholesale business class inventory not available on public sites.

Dedicated Concierge
Bypass airline call centers. Your personal agent handles rerouting and upgrades 24/7.

Complex Routing
We combine multiple carriers to build the fastest global routes.

Unpublished Fares
Access wholesale business class inventory not available on public sites.

A versatile multi-column section for supplementary features, detailed guarantees, or service specs.

3.1. Header Controls (Optional)

- **Section Title:** Text Input *(Optional — hidden if empty)*.
- **Subheading:** Text Input / Rich-Text *(Optional — hidden if empty)*.

3.2. Grid Configuration & Card Rules

- **Card Count Selector:** Radio / Segmented Control: 3 Cards | 4 Cards.
- **Per-Card Content Matrix:**

Field Name	Control Type	Specifications & Validation
Card Icon	File Uploader (SVG, PNG)	Fixed container size: 48x48 px.
Card Title	Text Input	Single-line heading.
Card Paragraph	Rich-Text Area	Multi-line descriptive copy.

Validation Rules:

- **Cards 1, 2, and 3:** All fields (Icon, Title, Paragraph) are **strictly mandatory**.
- **Card 4:** Optional. If the 4 Cards mode is active, all fields in Card 4 become mandatory before saving/publishing.

4. Bullet / Feature Points Section

Optional heading

Optional subheading

 Unpublished Fares

 Complimentary 24h Fare Lock

 Priority Concierge Callback

 Flexible Payment Options

A compact list-style layout highlighting quick features, perks, or bulleted requirements.

4.1. Header Controls (Optional)

- **Section Title:** Text Input *(Optional — hidden if empty)*.

- **Subheading:** Text Input / Rich-Text (*Optional — hidden if empty*).

4.2. Points Grid Configuration

- **Item Count Selector:** Radio / Segmented Control: 3 Items | 4 Items.
- **Per-Point Content Matrix (All fields are mandatory for active items):**

Field Name	Control Type	Specifications & Validation
Item Icon*	File Uploader (SVG, PNG)	Fixed container size: 48x48 px.
Item Label*	Text Input	Single-line benefit/feature description.

Validation: Every active item (3 or 4 based on selector) must contain both an uploaded icon and an entered label.
